

My name is Beverly Thompson and I have working at Carney Hospital as the Director of Food and Nutrition Services for 14 months.

I am especially happy to work for a faith based organization that supports the community and aligns with my personal values, of compassion, accountability, respect and excellence.

The Food and Nutrition Department is an integral part of the care team at Carney Hospital. For example, we recently had a patient who could not tolerate our tube feeding formulas and my team together with the patient's family and the physician were able to meet the patient's needs. The family was so appreciative of our willingness to accommodate our patient. This is a clear example of our mission and values at work. At Carney we are committed to going above and beyond in order to provide the best possible care.

- The transaction with Cerberus will help us to make improvements at Carney that will enable us to continue to provide this kind of care to our patients in this community.
- Having a partner with significant financial resources offers employees peace of mind and confidence in the long-term future of Carney Hospital
- I have confidence that this transaction with Cerberus will make it possible for Carney Hospital to continue to serve the community for many years.
- Thank you
